CAREER OBJECTIVE

Data-driven Computer Science graduate with hands-on experience in Python-based data analysis, SQL, and the Google Cloud ecosystem. Learning new tools quickly and eager to apply problem-solving and critical thinking skills to quantify numbers and patterns as independent and team.

EDUCATION

- **Master of Computer Applications (Generative AI)** - Alliance University, Bengaluru [2025 - Present]
SGPA: 8.7 (Up to 2nd Semester)
- **Bachelor of Science (Computer Science)** - KPR College of Arts Science and Research, CBE, [2025]
CGPA: 7.6
- **Higher Secondary Certificate** - Literacy Mission Matric Hr Sec School, Coimbatore [2022]
Percentage: 78.3%
- **Secondary School Certificate** - Literacy Mission Matric Hr Sec School, Coimbatore [2020]
Percentage: 71.4%

TECHNICAL SKILLS

Languages : Python (Pandas, NumPy, scikit-learn, NLTK), SQL (MySQL), Java, JavaScript, C

Front-end : React.js, CSS, HTML

Back-end : Node.js

Databases : MongoDB, MySQL, Firebase

Google Ecosystem : Google Workspace(Sheets, Docs, Gmail, Chrome), Google Cloud

PROJECTS

1. Follow-Up Forecaster | Python, Sheets, Sales Analytics, MySql

Built a predictive sales analytics platform that models prospect follow-up patterns, response latency, and conversion timelines to identify high-value lead segments, optimal outreach windows, and quantify business impact through interactive dashboards.

2. Opinion and Vibe Checker | Python, API V3, MySql, NLTK

Built an end-to-end data pipeline pulling comment data via API, cleaning and structuring it in MySQL, and NLP sentiment classification to surface actionable audience insights on a dashboard.

3. Last-Mile Routing Analyst | Python, Streamlit, Sheets, Google Maps Integration, MySql

Computed shortest travel paths over a Bengaluru road-network graph and integrated the Google Maps API for live visualization, reducing the routing time.

4. Price Anomalie Detector | Python, scikit-learn, Pandas, MySql

Analysed a second-hand car dataset with statistical methods and unsupervised anomaly detection to flag irregular pricing patterns; validated findings with data visualizations.

5. Toolkit DataSage | React.js, TypeScript, Firebase, Google Gemini API, Firebase, Three.js

Developed an AI-powered productivity platform integrating 70+ smart tools with intelligent data analysis, real-time insights, and personalized workflow automation using Google Gemini API.

INDUSTRIAL TRAINING AND EXPERIENCE

FacePrep Campus | Nov 2024 - Jun 2025 [7 Months]

Tracked and managed a weekly pipeline of 100+ prospects using spreadsheet-based tracking, reviewing follow-up timing and response patterns to prioritize outreach toward higher-intent leads.

CERTIFIED COURSES

Coursera: Data analysis, Front-end development, Google sheets, UI design and Prototyping, Machine learning, Java programming, Advanced data structures and algorithms, Databases, Python GUI.
