

Madan.K.K

"I Speak in Data and Think in AI"

Email: madankk2004@gmail.com | **Phone:** +919976037895 | **LinkedIn:** linkedin.com/in/madankk04122004
GitHub: github.com/Madankk-06 **LeetCode:** u/madankk-04122004/ | **Address:** Coimbatore, Tamil Nadu, India.

CAREER OBJECTIVE

My work depends on intersection of Generative AI and practical product thinking. I think about adoption before architecture. I understood the market before I study the stack. The only history that is worth a damn is the history I make today.

EDUCATION

- Master of Computer Applications(MCA) in Generative AI** - Alliance University, Bengaluru [2025-2027]
SGPA: 8.7 (Up to 2nd Semester)
- Bachelor of Science(BSc) in Computer Science** - KPR College of Arts Science and Research, Coimbatore [2022-2025] CGPA: 7.6

TECHNICAL SKILLS

Languages: Python (primary), Javascript, C++, Java
Web: React.js, Node.js, HTML5, CSS3, REST APIs
Databases: MongoDB, MySQL, Firebase, Supabase
ML/AI Frameworks: Scikit-learn, PyTorch
Cloud & DevOps: Aws (EC2, S3, RDS), Git, GitHub
Tools: VS Code, Postman, Jupyter, Figma, Canva
Core CS: Data Structures, Algorithms, OOP, System Design

INDUSTRIAL TRAINING AND EXPERIENCE

- FacePrep Campus | Nov 2024 - Jun 2025 [7 Months]**
Inside Sales Associate(ISA): Managed a pipeline of [50+ clients per week] prospects and converted to active enrollment through structured outreach and follow-up.
- L&T EduTech | Apr 2023 - Jun 2023 [Online]**
UI and UX Developer: UI design skill, UX and research skills, process and strategic skills, accessing tools.
- Content Creation | Mar 2023 - Dec 2023**
Digital Newspaper: Daily achievements and updates of students and Faculties. Data collection, Data verification, Digital and media skills, Content writing skills.

PROJECTS

1. Professional Portfolio | React | Vite | Framer-Motion | Ogl

Crafted a high-performance portfolio website with cinematic animations, 3D interactions, and seamless project storytelling.

2. Short Route Optimization | Python, HTML, CSS, JavaScript, Streamlit, Google Maps Integration

Developed a shortest route optimization system using Dijkstra's algorithm, Google Maps integration, and interactive route visualization for efficient path finding.

3. Anomaly Detection for Pricing Fraud of Second hand Cars | Python, scikit-learn, Pandas

Engineered 12 predictive features from 50,000 vehicle records and identified 2,450 high-risk pricing anomalies (5% of records) using machine learning-based anomaly detection.

4. MK-Homes Smart UI | HTML, CSS, JavaScript

Developed a responsive smart home dashboard featuring AI assistance, real-time power monitoring, and room-wise appliance control.

5. Recipe Recommendation Agent | React.js, HTML, CSS, JavaScript

Built a real-time recipe recommendation agent that generates multi-cuisine dish suggestions, preparation guides, and smart shopping lists from available ingredients.

6. Optimal Action Preparation System | Figma

Designed and prototyped OAPS, a productivity-focused application featuring structured task planning, goal tracking, and guided execution workflows to reduce procrastination

CERTIFIED COURSES

Coursera: Prompt engineering, Digital marketing, Data analysis, Front-end development, Google sheets, UI design and Prototyping, Machine learning, Databases, Java programming, Advanced data structures and algorithms, Databases, Python GUI

Workshop: Be10x AI tools Workshop

L&T EduTech: UI/UX Developer
